Cloud Solution Architect

PROFILE SUMMARY

- Highly accomplished Cloud Solution Architect with 18+ years of experience in managing Enterprise Infrastructure for Fortune 500 clients, including 8+ years designing, implementing, and managing scalable cloud solutions.
- Proficient in designing, building, and implementing AWS and GCP cloud infrastructure for optimal runtime behavior within a well-architected framework.
- Expertise includes advising on leading cloud practices, architectural approaches, and developing innovative cloud solutions.
- Skilled in managing a broad range of AWS and GCP cloud technologies in automated deployment environments, standardizing and migrating on-premises workloads to cloud offerings.
- Proven ability to identify and remediate security vulnerabilities, create secure designs and configurations, and manage IAM for cloud resources using Cloud Native tools, Domain Controllers, ADFS, and Google Workspace.
- Experienced in testing and improving resiliency for cloud workloads through Backup, Restore, and Disaster Recovery, along with performance monitoring, tuning, troubleshooting, and capacity management.

SKILLS & COMPETENCIES

- **Cloud Platforms:** AWS, GCP
- **AWS Services:** VPC, Networking, IAM, EC2, S3, ELB, ASG, EBS, RDS, CloudFormation, Route 53, CloudWatch, CloudFront, CloudTrail, Workspaces, Shield, WAF, AWS Backup
- **GCP Services:** IAM, Compute, Storage, GKE, GCP Networking, Big Query, Cloud SQL, Load Balancer, Pub/Sub, Cloud Function, Cloud Armor, Security Command Center, Logging, Monitoring, Billing
- **Security:** Cyber Security Operations, CrowdStrike, Rapid7 InsightVM, Lacework – CSPM
- **Virtualization:** VMWare
- **Operating Systems:** Microsoft Windows Server, Red hat, Ubuntu, Debian
- **Architecture & Design:** Architecture Design, Networking Concepts
- **DevOps & Automation:** Infrastructure as Code (IaC), Kubernetes, Terraform, Jenkins, CICD, Docker
- **Identity & Directory Services:** AD, DNS, DHCP, PKI, KMS, ADFS
- **Methodologies:** Agile, ITIL
- **Data/Analytics:** BigQuery, Dataflow, Composer, Dataproc, Data Fusion

CERTICATIONS

- Google Cloud Associate Cloud Engineer
- AWS Solutions Architect – Associate
- Splunk Certified Power User
- Cisco Certified Network Associate
- ITIL 2011 Foundation
- VMware VTSP 2016
- Six Sigma – Green Belt

EDUCATION

Bachelor of Engineering **2003-2007**
University of Rajasthan, Jaipur, India

PROFESSSIONAL EXPERIENCE

Tata Consultancy Services Ltd l Atlanta, Georgia, USA **Jan 2012 – Present**

Senior Cloud Infrastructure Engineer / Architect

- Led the consolidation of multiple on-premises datacenters, resulting in significant operational cost savings.
- Architected and migrated over 100+ applications and 1000+ VMs from 10+ datacenters to AWS, substantially reducing overall operational costs.
- Designed and executed the migration of 50+ applications and 500+ VMs from on-premises datacenters to GCP.
- Integrated ServiceNow (20+ catalog forms) with AWS and GCP for automated infrastructure and IAM deployments.
- Achieved 30%-40% cloud operation cost savings by rightsizing cloud resources, optimizing storage volumes (GP2 to GP3, migrating static files to Buckets), utilizing Spot VMs for fault-tolerant workloads, implementing auto-scaling, and cleaning up orphaned resources, outdated images, and snapshots.
- Enhanced infrastructure security by implementing CIS Benchmarks, enforcing IAM least privilege, RBAC, MFA, API, and Service Account Key rotation, and continuously monitoring IAM logs.
- Implemented advanced security tools including CrowdStrike, Rapid7 IVM, Lacework CSPM / CWPP, CyberArk PAM, AWS WAF, Shield, GCP Cloud Armor, and GCP Security Command Center.
- Created comprehensive DR designs and runbooks for over 100 applications, implementing fully automated pipelines with N2WS and Commvault tools.
- Developed 50+ Splunk dashboards for continuous monitoring of cloud network traffic, enabling real-time identification of DDoS and malicious traffic, tracking cloud resource inventory, availability, and performance, and integrating events with ServiceNow incidents.

Bristlecone India Limited | Noida, India **Mar 2009 – Jan 2012**

System Administrator

- Maintained complete IT infrastructure, including Server Hardware, VMware Environment, and Data Storage.
- Managed and supported Backups, Emails, Antivirus, Mobile Devices, Switching and Routing, VOIP Systems, VPN, Firewall, Network Monitoring, and all Microsoft and Network technologies.
- Designed and administered server consolidation programs using VMware ESXi server and VMware Virtual Center.
- Managed inventory of all IT infrastructures and provided remote administration of servers.
- Administered Active Directory users and groups, Group Policy deployment, DNS, and DHCP servers.
- Created standard server builds, ensuring timely updates of service packs and hotfixes.

HCL Infosystem Limited | Mumbai, India **Sep 2007 - Mar 2009**

Customer Engineer

- Maintained and managed all System and Network resources at client sites according to specific IT environments.
- Provided support for multiple Enterprise Client IT Infrastructures.
- Managed and maintained System, Network, Storage, and Backup resources.
- Provided Tier 1 & 2 technical support to end-users, resolving hardware and software issues.
- Managed virus protection and remediation.
- Maintained MS Exchange environments.
- Created standard server builds and updated latest service packs and hotfixes.
- Conducted routine system updates and maintenance, ensuring compliance with security standards.
